Did you know that by the age of three most pets already have signs of periodontal disease?

Regular preventive care is essential for your dog's continued health. Our wellness plan saves you money on the total cost of recommended preventive care and treatments. Best of all, this plan features budget-friendly monthly payments - making it easy to manage your dog's healthcare costs.

Dental Health is Important

Almost every dog will develop some degree of dental disease in their lifetime. In fact, by the age of three most pets already have signs of periodontal disease. Starting early and providing regular dental care is important.

The Unseen Harm

While bad breath and yellow teeth are some of the obvious signs, poor dental health results in chronic pain for your pet and can lead to kidney, liver and heart disease. Regular dental cleanings and evaluations are an important step to help your pet lead a healthy and happy life.

Prevention is the key to better health

Preventive care can improve your dog's quality of life and help add more healthy years. It's essential for detecting diseases early on, before they become more serious - and more expensive.

This wellness package is for preventive care services only and does not include services for medical conditions, illnesses or emergencies. This is not insurance. Billing services for your wellness plan are provided through VCP. If you have any questions regarding your pet's treatment, please contact your veterinarian. Program may change without notice. See terms and conditions of your wellness plan agreement for a summary of treatments.
